

MaxiCut® Ultra™

ASSURED PROTECTION

MaxiCut® Ultra™ is our latest cut offering that integrates the core values of MaxiCut® into a thinner, more comfortable and durable package.

DURAtech®

A technology platform that makes gloves last longer. Why? Because long lasting gloves simply makes good economic sense but it's not all about the durability. It's also about making sure your gloves are fresh and clean so we've designed our gloves so they can be laundered. That way you're able to make full use of the outstanding durability offered.

CUTtech®

INNOVATIVE FIBRES - ATG® source their own ingredients to develop their own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort

REINFORCEMENT - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area

ERGOtech®

FORM, FIT AND FEEL - mimics the "hand at rest", reducing hand fatigue and increasing comfort

LATEST KNITTING TECHNOLOGY - utilized to produce a smooth and rounded fingertips, improving fingertip sensitivity

CONSISTENT PENETRATION FREE LINER - from the nitrile, leaving only the soft liner resting against the skin *i.e. no strikethrough*

GRIPtech®

OPTIMIZED GRIP delivered through the micro-cup finish allows for a controlled grip.

AIRtech®

360° BREATHABILITY - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today.

SKIN FRIENDLY - The well-being technology eliminates all traces of process chemical and odours. MaxiCut® is "skin friendly" and certified to the Oeko-Tex 100® standard, which means the gloves are certified that they do not contain any harmful/carcinogenic solvents.

REACH COMPLIANT - All ingredients used in the manufacturing and construction of MaxiCut® are compliant with REACH - "Registration, Evaluation, Authorisation and Restriction of Chemical substances". REACH is a new EU directive with the key aim to provide high levels of protection to human health & environment.

PRODUCT DISCLAIMER: Gloves that provide cut resistance are not cut-proof. The risk for these sorts of injuries will not be completely eliminated or prevented by the use of gloves. Cut resistant gloves are not intended to provide protection against powered rotated blades or equipment, serrated or other sharp or rotating equipment. It is the responsibility of companies and/or glove users to perform their own testing to determine the suitability for a particular application or use within the environment the gloves are to be used. Safety Mate Pty Ltd may revise this information as new information, knowledge or experience becomes available.

IMPROVING THE CUSTOMER EXPERIENCE THROUGH INNOVATION

ATG's technology platforms are continuously developed by a core team that matches market research and marketing analysis with the latest technological developments. This forms the foundation upon which we continually improve the customer's experience through constant innovation.

Why? It is because we understand the complexity of choosing and implementing a hand protection programme that works and is adopted by all.

On one side, your workforce continually asks for gloves that are more comfortable whilst on the other side there is a focus to reduce injuries, the costs associated with those injuries and to improve worker efficiency.

We aim, via use of our technology platforms, to combine comfort and worker acceptance with performance and safety features.

We have also recently added a "well being" technology platform that takes care of your hands during and after work.

Our products include technologies that follow one of three themes:

1. Comfort
2. Performance
3. HandCare™

These technologies are used individually or collectively to provide you with the glove that is guaranteed skin friendly thanks to our partnership with the Skin Health Alliance. All our gloves are designed to last and can be laundered to ensure that we are able to maintain our commitment to you of "value for money".

ATG® HANDCARE® PROGRAM

Our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG's full range of gloves are "dermatologically safe" and the science and research behind them is robust.

Tested for harmful substances according to Oeko-Tex Standard 100 No. 08.184.57867 FI Hohenstein

Our gloves are guaranteed to be 'fresh out of the pack'. How? We wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process we prefer the usage of rain-harvested water. Our gloves are certified by Oeko-Tex® Standard 100 which ensures that our gloves are free of known harmful substances including legally not regulated chemicals. The standard requirements clearly exceed existing national legislation.

Our whole manufacturing process is in line with the requirements of the European REACH Regulation (Registration, Evaluation, Authorisation and restriction of Chemical Substances).

Within our gloves we use sanitized to keep odors to a minimum. Sanitized® is like a deodorant that helps keep your gloves fresher longer and leaves you feeling safe and protected. Please note that ATG® uses a specific grade of Sanitized® that is "triclosan free".

This glove has been laundered prior to final packaging making it clean and safe for use.

As an expression of our responsibility towards our planet, we have appointed a dedicated team that continually measures and monitors the short and long-term ecological impact of all our production processes. This team's expertise team also helps us to think ahead, improve performance and find ways to further minimise our global environmental footprint. This entire monitoring process is ISO 14001 certified and serves as the foundation for our environmental framework as well as our HandCare® Programme.
